ACADEMIC	The University of Akron	Akron, Ohio
APPOINTMENTS	Assistant Professor in Accounting	2025-present
	Visiting Assistant Professor in Accounting	2024
RESEARCH INTERESTS	I apply neoclassical economic analysis to the study of corporate taxation, the structure and role of capital information intermediaries, the real effects of accounting, the accounting labor market, and firm strategies.	
EDUCATION	Washington University in St. Louis	St. Louis, Missouri
	Ph.D. in Accounting	2024
	Master of Science in Business Administration, Accounting	2023
	University of Texas at Dallas	Richardson, Texas
	Graduate certificate in Accounting	2018
	Xiamen University	Xiamen, China
	Bachelor of Management, Accounting	2017
	Bachelor of Art, English	2017
RESEARCH	[1] The (Limited) Competitive Advantage of Tax Planning <i>Solo-authored</i> http://dx.doi.org/10.2139/ssrn.4817541 • Innovations in corporate tax planning increase excess returns. • This relation reflects competitive advantages from tax planning. • The competitive advantage of tax planning is limited and lacks persistence. [2] Serial Correlation of Analyst Coverage Initiations (<i>Buchan prize winner</i>) <i>with Richard Frankel and Yaping Zheng</i> • The serial correlation of initiations captures the setup cost of following a firm. • The serial correlation varies with accrual quality and GAAP changes. [3] Misapplications of Accounting Rate of Returns in Taxation Literature <i>Solo-authored</i> • Tax planning investments, when immediately expensed, reduce the contemporaneous accounting rate of return. • These investments increase future accounting rates of return but do not indicate any “real effects” of tax planning. [4] Conservatism, Compensation, and Firm Innovation <i>Solo-authored</i> • Conservatism or pay for performance alone cannot effectively induce innovation.	

- Combining conservatism and high bonuses is associated with better innovation.
- My results support Laux and Ray (2020)'s view that more conservatism increases the informativeness of good signals, allowing higher bonuses for high outcomes.

WORK-IN-PROGRESS

[1] Accounting Profession in the Era of Dopamine Indulgence: Evidence from Online Sports Betting Legalization

with Bo Ren

[2] Financial Information Federalism

Solo-authored

[3] Peer Tax Planning Co-movement
